Summary

Title: Fullstack Software Developer

I am a talented Junior Software Engineer trained to work with customers, team members and project leaders to accomplish software engineering and updating tasks according to timelines.

With a solid understanding of full development lifecycle, skilled to work with front and back-end technologies to produce and evaluate projects, I look forward to joining a dynamic team and contribute towards providing creative solutions and making the world a better place; one day at a time.

In addition, I have industry specific training and experience in IT, Statistics and Finance. View [My LinkedIn Profile](#) and [My GitHub Profile](#) for a sample of the applications and websites I have built over the past few months.

Experience

Software Developer

01/2022 - Present

- Efficient collaboration with team members and leading a number of projects as SCRUM MASTER.
- Designing the structure of websites and apps, optimizing for mobile devices
- Creating the logic that instructs applications on how to interpret user input and what feedback to give the user after executing the submitted request - I achieved this by creating algorithms that fetch and manipulate data stored in database systems mainly using python, Flask,Django, Flutter and SQL.
- Developing app integration with REST APIs for google maps, social media authentication, movie APIs and other services.
- Proficient in Git and Git-hub for version control
- Managing time-sensitive updates, including content changes and database upgrades
- Planning, writing and debugging web applications and software with complete accuracy.
